***Abstract*—This is a very abstract abstractionary abstract.**

I. Abstract

II. Fundamental Rules

A. Body, Font, and Line Styles

The body style, font, and line style cannot be modified. The body is divided into two columns. The text is in Times font and size 10 points. The text must be justified on both margins. On the last page, the columns must be balanced. A new paragraph is indicated by indenting the first word.

B. Figures and Tables

Figures and tables may be placed within a column or within the body. In both cases, the figure or table is centered within the column or body. Both environments are numbered independently. The figure caption begins with *Figure n:*, uses regular text at 10 points, and is placed below the figure. In contrast, the table caption is located above the table. Figure 1 shows a figure within the column, while Figure 2 is an example of a figure placed within the body. Table I provides an example of a table that spans both columns.

Figure 1. Figure within the column.

If the object is within a column, it can be placed anywhere in the column; however, if it spans both columns, it can only be placed at the top or bottom of the page.

C. Length

The maximum number of pages for the work is 20, including the bibliography but excluding the cover page.

III. Bibliografía

The style to be used is *abbrv*. References are ordered alphabetically by the surname of the first author. In the text, the reference number is used in brackets. If multiple references appear together, a single pair of brackets should be used, and they should be in ascending numerical order.

Using BibTeX is highly recommended. Examples of referencing: [**?**, **?**] or simply [**?**].

IV. Conclusions

This document contains all the styles you need, already defined in accordance with the rules described here.

V. Appendix

Only if deemed necessary.

The following filler text has been added to better visualize the placement of the table and figure on the next page.
